

Product specifications: L01

- 1) Battery: - 3.2 Volt, 1000mAh, LiFePo4 battery
- 2) Solar panel: - 6.5Volt, 1Watt, amorphous panel, with aluminum frame & 5m wire. Also better work in cloudy climate
- 3) Led's :- Torch mode -two LED's of ½ W & Bright/Dim mode-one Led of 1 W
- 4) Enclosure: - Water-sealed Polycarbonate & ABS material enclosure
- 5) Charging-Blinks while charging, blinks continuously when fully charged

Battery:-

- 1) Long life 3.2V, 1000mAh LiFePo4 Rechargeable battery.

The LiFePO4 battery is the safest battery as it doesn't catch fire unlike lithium ion battery which is used commonly & has one of the longest battery life in the industry.

Solar Panel:-

6.5Volt, 1Watt, amorphous silicon panel, with aluminum frame & 5m cable. Also better work in cloudy climate.

Mode Of operation:-

Three modes of functioning of light-

- 1) Bright mode-This mode gives the highest lumens out of the three modes and can be used for room lighting
- 2) Dim Mode-This has the lowest lumens and can be used in the night time as a night lamp.
- 3) Torch mode-You can switch to this mode while using it as torch or as a table lamp for focused light.
